

## **Botanical list**

Plant taxa appearing in the schedules are listed below, with a few exceptions, following the latest work of the Angiosperm Phylogeny Group (<http://www.mobot.org/MOBOT/research/APweb>).

Enquiry should be made of the show secretary if there is doubt as to whether a specimen belongs to one of the taxa for which there is a class.

Copies of this list and of the 'reverse list' (i.e. genera to plant family) can be downloaded from the Club website (<https://www.srgc.net/add-show-info.asp>).
