

The Scottish Rock Garden Club Forrest Medal - Aberdeen 2024 *Haberlea rhodopensis* Shown by David Millward

The Forrest Medal was won by Dave Millward's *Haberlea rhodopensis*, a native of the Rhodope mountains in Bulgaria and northern Greece. Dave's Forrest medal winning Ramonda from last week in Glasgow was still in fine form. Both his Forrest winners are members of the Gesneriaceae which prefer similar semi-shady conditions.

Congratulations Dave!
